## SPECIAL BARGAIN

**50,000 EXTRA CHOICE SUMMER BLOOMING IRIS KAEMPFERI  
MUST BE MOVED AT ONCE**

These begin to flower after the Iris on the other side of the sheet have finished flowering and prolong the Iris flowering season 30 days. They are those large showy Iris, the most striking of the entire Iris family, with flowers often as big as a dinner plate and flowering in greatest profusion. While the individual plants will not be labeled, the colors will be white, blue, purple, burgundy, pink, etc. There are singles and doubles, solid colors, striped and marbled and blended effects, soft pastel tints to the most gorgeously brilliant colors. All will be fine strong healthy flowering size plants, freshly dug for your order. Now is the time to plant them for best results. I promise that you will be amazed at the beauty of this collection. These will be shipped from my Nursery in New Jersey where they are grown.

## SPECIAL BARGAIN PRICE

**10 for \$2.50**

**20 for \$4.00**

**75 for \$12.00**

## 16 WORLD'S FINEST SIBERIAN IRIS — \$2.50

This is not only a very unusual collection; it is indeed, in my opinion, the finest collection of Siberian Iris obtainable anywhere in the world at any price. I will include in this collection varieties that originally sold at from \$5.00 to \$25.00 for a single plant. The richest Royal Purples, pure snow whites, soft and medium blues, red tones, etc., unlabelled.

Many eminent authorities consider the Siberian Iris the most elegant of the Iris family. They are prodigious bloomers, an established clump often producing 50 or more flowering stalks, with hundreds of flowers open at one time. They are of the easiest possible culture and once planted will take care of themselves anywhere. No garden should be without these beauties when they can be had at such nominal cost.

## 12 VARIETIES OF APPLES ON ONE TREE 24 DIFFERENT VARIETIES ON 2 TREES, \$20.00 EACH THE LATEST AND GREATEST SENSATION

For those who may be interested in this Marvel of Horticulture, I have only a limited quantity for delivery this Fall and next Spring. I do not at present have enough of them to list in my catalogue, and expect they will all be sold before time for delivery comes around.

The parent trees are the Dark Red Delicious, and they are now bearing fruit. Eleven other varieties are "budded" into these Dark Red Delicious trees so that there will be 12 branches, each branch bearing a different variety of fruit. The trees are now about 10 feet high and the finest trees were selected from a large block for this special "budding" process so that each tree will be symmetrical and nicely branched. After a year to become established in their new location the trees will be ready to produce fruit — 12 different varieties of apples all on one tree, red apples, yellow apples, early apples, late apples, sweet apples, tart apples, eating apples, cooking apples.

To produce these fine trees to such perfection requires a great deal of work and expert care and it is necessary to get \$20.00 each for them, but I believe they will add \$1000.00 value to any property where they are planted. Certainly they will prove to be a sensation whenever they are planted, besides being immensely practical from a standpoint of utility and beauty.

This is not an expense but an investment, as they will pay for themselves in delicious fruit over and over again, year after year, for a full lifetime and there is no more lovely spring flowering tree than an apple tree.

## POTTED "MASTODON" EVERBEARING STRAWBERRIES FOR PLANTING NOW

The "Mastodon" is generally recognized as the "Best of all" Everbearing Strawberries. The fruit is large and of delicious flavor and it is a reliable producer. Pot grown Strawberries are the most practical for home culture, having all their roots contained in a ball of earth ready to be transplanted without any shock. It is a recognized fact that pot grown plants will produce more berries of larger size. If planted soon these pot grown plants should produce berries this Fall and an abundant crop next year.

Strawberries are hardy even as far north as Alaska and will produce an abundant crop in any good garden soil. The addition of a liberal supply of humus is highly beneficial.
